

PDF Gecko Verification Sample

PAGE - 1

Use this file to compare behavior before and after editing, saving and compression.

1. Searchable text

Search for this exact keyword after processing:

GECKO-SEARCH-2026

This sentence is real PDF text and should be selectable before image-based compression.

2. Clickable link annotation

<https://pdf-gecko.net/>

3. Interactive text field

Try clicking and typing in the field before processing:

TYPE-HERE

4. Fine lines and small text

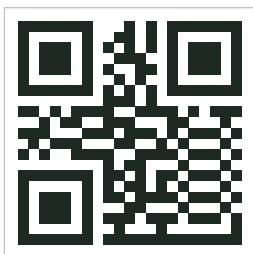

0.2 pt _____

0.5 pt _____

1.0 pt _____

Six-point text: ABCDEFGHIJKLMNOPQRSTUVWXYZ 0123456789

5. High-contrast detail marker

Use this marker to compare edge sharpness after JPEG regeneration.

Baseline checks: searchable text / clickable link / form field / fine detail / page order

Keep the original and compare it with every generated PDF.

Page-order and visual-fidelity checks.

SECOND-PAGE

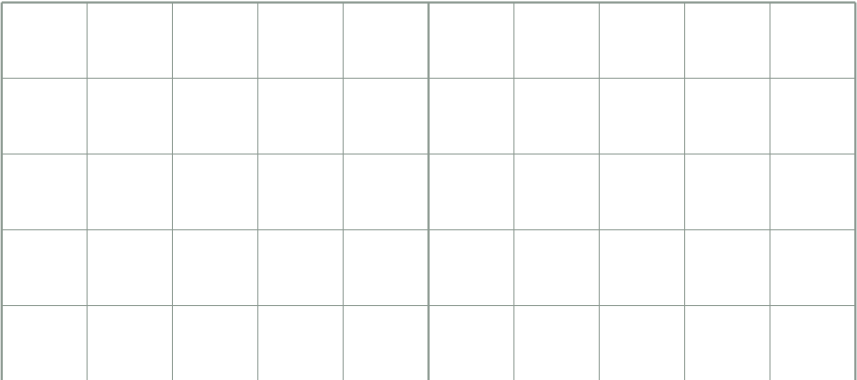

If this marker appears on page 2 after saving or merging, page order is intact.

6. Repeated searchable content

GECKO-SEARCH-2026

A second occurrence makes it easier to detect whether all pages retain searchable text.

7. Alignment grid

Check whether thin grid lines stay continuous and aligned.

8. What to record

- ☐ Page count and order
- ☐ File size in bytes
- ☐ Search result for GECKO-SEARCH-2026
- ☐ Link annotation behavior
- ☐ Interactive form behavior
- ☐ Fine-line and small-text appearance
